

EcoCabinet™**Data Center Cabinet****EC-4200****Data Center Cabinet for
EcoServer™ plus EcoRAID and FlashDisk Storage Solutions**

The *EcoCabinet* is a solid and affordable foundation for new IT infrastructure. It is only 24" deep to save cooling costs and eliminate hot spots - and fits in four sq. ft.

EcoCabinet

EcoCabinet was selected to house companion servers and storage products, including EcoServer servers and EcoRAID and FlashDisk storage as well as a complete line of accessories including EcoUPS and EcoSwitch for Fibre Channel and Ethernet. All of these products are designed for shallow form factor to take advantage of the reduced heat and thus reduced cooling needs of this design. Shallow racks also reduce floor space. However, completely full, the 42U rack holds 21 powerful 2U EcoServers or 504TB of FlashDisk data storage in just four square feet of floor space.

Ecological

Telecommunications companies have always used small racks to reduce cooling costs by reducing hot spots that overtax air conditioning systems. Now data centers can benefit from this well known principle.

Economical

Priced to compete with any quality data center rack, the EcoCabinet is a great value and good companions product for EcoServers, EcoRAID and FlashDisk products. It is configured for use in environments where the storage and servers are important to the enterprise.

Systems Integration

EcoCabinet combined with servers, storage and accessories including switches and UPS systems - enables IT managers to obtain an integrated solution from a single vendor that supports the entire hardware infrastructure. IT managers concentrate on the applications and the business value created.

Single Source Support

The entire integrated solution of EcoCabinet, EcoServers, EcoRAID and FlashDisk storage and accessories are supported under a single warranty and service contract. This eliminates the finger pointing often found in self-integrated hardware solutions. The standard warranty includes 24x7 call center support and next day on-site service. Four hour response service is also available as an option.

Specifications

•External rack height	84 inches
•Color	Black
•Energy Savings	24" depth saves cooling and eliminates hot spots
•Usable rack space	42U (73.5")
•Construction	High performance extruded aluminum welded frame
•Shelf mounting	Sliding shelf mounting
•Wheels	4 casters for transport
•Position locks	4 bolt down base locks with load levelers
•Stabilizers	Retractable anti-tip stabilizers
•Filler panels	Convex 1U panels with textured powder coating
•Cable troughs	Recessed for organized cable dressing
•Weight, empty	215 lbs
•Max. weight, loaded	1200 lbs with casters, 2000 lbs with bolt down base
•Dimensions	24" x 24" x 84"
